LEVEL MEASUREMENT

This solid and puristic metal bank allows the optimal use of the full volume and obstacle-free insertion of large-sized recyclables

- Rounded edges and smooth surfaces without dead spaces guarantee maximum comfort in handling, emptying and maintenance
- Advanced ergonomics due to reduced throw-in-height
- Best ratio size-useable-space thanks to double chains guided by rollers
- Interior can be completely filled, no obstacle for throwing and collecting
- 90° opening flaps mean that emptying is completely friction-free
- The ultimate bank for large recyclables and cardboard
- Large metal surfaces allow full individualisation with stickers
- Marti is the only recycling bank that can be equipped with access control for pay as you throw policy. It's moveability is an advantage in comparison with underground and semi-undergroundsystem
