Harmonises perfectly with modern architecture

ICEBERG® MAX4 provides an attractive design alternative and, like the other deposit columns from the Iceberg series, integrates harmoniously into cityscapes that are characterised by modern architecture. 2 different shapes are designed for the **ICEBERG® MAX4**.

The special designed shaped for the double drum is for the easier throwing-in of waste sacs. The slot system can be configured with high-quality equipment options like paper stainless-steel swing or digital access control without any problems.

The benefits of our concrete container

- Seamless positioning of the underground systems possible
- Due to the depressions in the concrete crowns, the surface water can run off better when the concrete tanks are placed next to each other
- 4 pump sumps: For easier pumping of water out of the concrete container
- Made of 100% waterproof concrete
- Quality: C45/55
- If the groundwater level is too high, the concrete container is also available with buoyancy protection
